

School of Quantum Communications Networks, organized by the EU-funded QCall network, will take place at the Department of Information Engineering, University of Padova, in Padova, Italy, from 19 to 22 September 2018. This school will feature [talks](#) by leading scientists in the field on the development of quantum communications networks. Representatives from industry will also contribute to the programme. The attendants are expected to be familiar with basic quantum applications such as QKD and quantum teleportation. The school also provides a unique opportunity for discussion and to share ideas.

The School will be held at the monumental city of Padova, Italy. Detailed information on how to get to Padova can be found in the [Travel info](#) page.

A limited number of positions are available for external participants. Interested parties are invited to apply for the School by filling out the [application form](#). You will be notified of your acceptance soon after. You will then be instructed how to pay for registration fees.
